Skills

- JavaScript
- Chrome Firebase
- Node JS
- CSS3
- GitHub
- Python
- HTML 5
- Azure
- AutoCAD Civil 3D

Frameworks

- Redux
- Express.js
- React
- Bootstrap
- React - Bootstrap

Data bases

- Firebase Realtime DB
- Mongo DB

Projects

MERN Stack Application (MongoDB, Express.js, React.js, Node.js)

E-commerce store

For this application Frontend part developed using React Hooks. Authentication is handled by backend server utilizing Node.js + Express.js. All user's information is linked to MongoDB database. Application is published to Azure VPS.

React + Bootstrap + Chrome Firebase Application

E-commerce store

This application is a demonstration of my web development abilities. You can create "fake" orders to demonstrate full cycle of the e-commerce store web-site functionality. Feel free to go through the steps of creating the order: create an account or sign in as a guest, add items to the cart, watch your cart update, input profile information, proceed with the order and message the seller if needed. Front end portion developed using React Classes and functional components. The process of authorization is handled with the Chrome Firebase Authentication. All user's information is linked to Chrome Firebase Realtime Database. Application is published to GitHub Pages.

Experience

04/2019 – Present

Project Manager

John A. Edwards & Company

Established project management strategies for the successful execution and delivery of construction projects utilizing cutting edge software, while providing professional services associated with stormwater management, roads & site grading, utilities layout and plan production according to the project schedule.

01/2018 – 04/2019

Civil Engineer Level 1

R Joe Harris & Associates INC.

- Provided engineering/technical expertise and guidance in the identification, analysis and resolution of routine problems.
